PROFILE SUMMARY

Fifth-semester Computer Science student at Bina Nusantara University (BINUS) Alam Sutera, specializing in Intelligent Systems, with a strong interest in artificial intelligence. Experienced in teaching and mentoring through the BINUS SASC Scholarship mentoring program, the Freshmen Partner program, and as a part-time Mandarin teacher. Working knowledge of Python, JavaScript, C++, HTML, and CSS, plus software project management.

WORK EXPERIENCE

Chinese Teacher (Part-time) — Ren Ai Mandarin Learning Centre Jul 2026 – Present

- Teach Mandarin as a part-time Chinese teacher at the learning centre.

SASC Scholarship Mentor — BINUS University Jan 2026 – Jul 2026

- Mentored undergraduate Computer Science students through the BINUS SASC mentoring program.
- Helped mentees improve and monitor their academic performance through guided practice, concept reviews, and personalized support.

Freshmen Partner — BINUS University Sep 2025 – Jul 2026

- Guided first-year BINUS students throughout their transition into university life.

SELECTED PROJECTS

The Atelier — Barbershop Booking System (Team Project) Next.js, NestJS, Prisma, PostgreSQL

- Built a full-stack barber booking web app with separate customer and barber roles and appointment booking.
- Designed around real-time slot availability and double-booking prevention, with a dark, mobile-first interface and a written PRD.

MindEase — Mental Health Chatbot Python, FastAPI, React, NLP

- Developed an NLP-based mental health chatbot with a FastAPI backend and React frontend.
- Cleaned emotion and mental-health text datasets (GoEmotions, Mental-Health-Twitter) and trained a text classifier with a saved vectorizer.

Beel-Bot — Quiz Automation Agent Python, LLM, Browser Automation

- Built an async Python agent that logs into an online learning platform and completes quizzes automatically, using an LLM to pick answers and browser automation to click, check, and advance.
- Supported multiple question formats (multiple choice, text input, click-the-word, drag-and-drop) through separate detection, solving, and execution modules.
- Added audio transcription for listening questions and a retry mechanism that excludes wrong answers (up to 5 attempts) based on page feedback.

AI Forest Fire Prediction System, Kalimantan & Sumatra (Team Project) AI/ML, Data Science

- Contributed to a forest fire prediction system using AI and climate data, with separate backend and frontend.

RESEARCH & PUBLICATION

LQ45 Stock Forecasting with Hybrid LSTM-GRU and IndoBERT Submitted to ICORIS 2026 (not accepted)

Enhancing LQ45 Stock Price Forecasting Using Hybrid LSTM-GRU Networks and IndoBERT-Based Sentiment Analysis. First author, with Kent Natan Herlambang, Samson Ndruru, and Ivan Sebastian Edbert.

- Proposed a hybrid forecasting model for the LQ45 index that combines daily OHLCV data (Jan 2020 – Dec 2023) with sentiment scores from a fine-tuned IndoBERT classifier on Indonesian financial news (CNBC Indonesia, IQPlus).
- Cut MAPE from 25.03% to 13.48% (RMSE 0.0131, MAE 0.0093) versus the same model without sentiment; IndoBERT reached a validation F1-score of 0.86, with hyperparameters tuned by Bayesian Optimization.

EDUCATION

Bachelor of Computer Science — Bina Nusantara University (BINUS), Alam Sutera Sep 2024 – Present

- Specialization: Intelligent System Streaming (5th Semester).

Sekolah Terpadu Pahoa Jul 2009 – May 2024

LICENSES & CERTIFICATIONS

- TOEFL ITP — TOEFL (Nov 2025).
- Microsoft AI-900T00-A — Learning AI from the Basics, Microsoft (Mar 2026).

SKILLS

Programming: Python, JavaScript, TypeScript, C++

Web Development: HTML, CSS, React, Next.js, Tailwind CSS, FastAPI, NestJS

Database & ORM: PostgreSQL, Prisma

AI & Machine Learning: Deep Learning (LSTM, GRU), scikit-learn, NLP, Sentiment Analysis, IndoBERT / Transformers, Time-Series Forecasting, Hyperparameter Tuning (Bayesian Optimization), LLM Integration, Speech-to-Text

Automation & Tools: Playwright, Browser Automation, Async Python, Git & GitHub, Vercel

Management & Teaching: Software Project Management, Teaching, Mentoring

Languages: Indonesian, English, Chinese
